

Introducing the new range of Server Lifter from EDP Europe

The all new 2009 range of Server Lifters from EDP Europe has arrived. The line up includes a range of models with a choice of 65Kg, 85Kg, 105Kg, 155Kg and 205Kg lifting capacities in both standard height and extended lift height versions. EDP Europe's new range of server lifters, are designed specifically to tackle the challenges of your typical data centre environment. Unlike the more traditional bulky alternatives, our range of Server Lifters are both lightweight and portable and could not be easier to use. The highly attractive design allows for full operator protection, offering dual speed elevation and descent with power provided by a mains rechargeable battery pack.

Server Lifter Features & Benefits Include:

- Dual speed elevation and descent
- Full operator protection, reducing the risk of injury and greater protection of staff (e.g. back injuries)
- Battery charge meter
- Soft grip bull bar handles
- Highly attractive design
- Greater protection for computer hardware during the installation process
- Capable of lifting weights up to 205kg
- Available from stock
