

PRODUCT OVERVIEW

HUBER+SUHNER IANOS is an advanced fibre optic management system.

The IANOS Lite chassis 1U comes in a standard and skeleton design and is suitable for medium-density applications where connections to servers and switches are required in the same or adjacent racks. With its fixed trays and optional cable management, the chassis supports up to 96 fibres (48 ports) per 1U of rack space.

Features & Benefits

- Subrack for up to 8 modules / 48 x ports (LC-duplex, SC Simplex/ MTP) per 1U height space.
- Quick and simple installation of subrack, modules and cables.
- Insertion of single and double modules from the rear and front.
- Easy access and protection of ports through horizontal opening front-door (Optional).
- Fixed tray design.
- Labelling within front-door or as a slide-out system.
- Compatible to all double or single IANOS modules.
- Available as standard, skeleton and central cable management configuration.

Technical Data

Mechanical Data	
Characteristic	Value
Product family	IANOS
Suitable for	IANOS Modules
Dimensions (w x l x h)	482mm x 301.3mm x 44mm / 19" x 11.9" x 1.7"
Rack height (U)	1U
Weight	1Kg / 2.2lbs
Material chassis	Steel
Colour chassis	Telegrey 4 (RAL7047)
Capacity of modules (pcs)	8
Compatibillity	EDR
Mounting type	Front mounting

Environmental Data	
Characteristic	Value
Free of halogen	Yes
RoHS compliant	Yes
REACH compliant	Yes
