

ONE-CLICK® CLEANER SERIES

THE ORIGINAL ONE-CLICK CLEANER

PRODUCT OVERVIEW

Easy-to-use solution for cleaning fibre optic connectors on jumpers and in adapters. Since over 85% of network outages are attributed to dirty and/or damaged connectors, it is critical to clean every connector!

The patented One-Click Cleaner uses the mechanical push action to advance an optical grade cleaning tape while the cleaning tip is rotated to ensure the fibre end-face is effectively, but gently, cleaned. It is a favourite of field technicians for its ease of use, durability, effectiveness, and small size.

One-Click® Cleaner PRO

The One-Click Cleaner PRO is a high-performance cleaner built for speed and efficiency. It features an integrated guide cap design that reduces cleaning time up to 50% by eliminating constant switching of caps for cleaning the ferrule end-face on connectors, in or out of bulkhead adapters. The One-Click Cleaner Pro boasts over 775 cleaning cycles in an ergonomic push-type cleaner, which is a significant increase from the previous model's 500 clean limitation. Designed to meet the needs of Data Centres, factories, and FTTH environments, One-Click Cleaner PRO optimises optical connectivity, reduces downtime, and improves efficiency, making it an essential tool for fibre connector cleaning.

Features

- Patented single-action cleaning in a small ergonomic design
- Variety of sizes and types for different connector styles
- Cleans connectors in both jumpers and bulkhead adapters
- Low cost per clean

Applications

- Removing oil, dust, and dirt without damaging delicate fibre end-faces
- Both dry and wet cleaning (add cleaning fluid)
- Clean connectors in tight spaces
- Field or laboratory use
