

# KoldLok® Raised Floor Grommets

## Market Leading Solution For Sealing Cable Openings

**KOLDLOK®**

KoldLok® raised floor grommets are the leading solution for sealing cable openings in Data Centre and Computer Room raised floors.

Sealing cable openings reduces bypass airflow, and can help improve energy efficiency as part of an overall airflow management policy.

- KoldLok is a range of raised floor grommets designed for sealing cable openings.
- Sealing cable openings increases static pressure under the floor, reduces bypass airflow and improves cool air delivery.
- KoldLok Integral & Split Integral are designed to fit within the floor tile and are ideal for new cable cutouts.
- KoldLok Surface, Surface L & Surface XL are designed to fit round existing cable cut-outs with L and XL models sealing larger openings.
- KoldLok Round are available in 4" and 6" models and are easier to install as the opening can be cut using a hole saw.
- 3" & 6" KoldLok Extended grommets can be used for holes around walls and custom openings.
- The SplitLok™ Integral / Square raised floor grommet is moulded from a smooth finish ABS plastic that has a split interlocking feature that makes it easy to install.
