Adjustable Rack Gap Panel

Part Numbers
46-10164-SM    Small Adjustable Rack Gap Panel (42U-45U)
46-10164-LG    Large Adjustable Rack Gap Panel (48U-50U)
46-10164-SPK   Striker Plate Kit Accessory

Application
The AisleLok® Adjustable Rack Gap Panel is an ideal solution for closing off gaps between racks, such as gaps created by building support columns or missing IT racks.

- The Adjustable Rack Gap Panel features a tool-less design and easily attaches directly to the rack side panel magnetically.
- With the case mounted, the user simply extends the retractable material across the gap, effectively closing off the opening when the handle attaches magnetically to the adjacent cabinet side panel or striker plate kit for non-metallic surfaces.
- The AisleLok® Adjustable Rack Gap Panel can enclose gap widths 254mm to 1,524mm (10” to 60”) wide.
- The Adjustable Rack Gap Panel is available to match popular rack heights.
- Total installation time is typically less than a minute when installing product between two cabinets.
- Adjustable Rack Gap Panel Striker Plate Kit (10164-SPK) can be attached to non-metallic surfaces to allow for installation of the Adjustable Rack Gap Panel in areas where an adjacent cabinet is not present.

Features
- Covers gap widths from 254mm to 1,524mm (10” to 60”).
- Easy to order; no measuring or customisation required.
- Installs out of the box. No assembly or configuration required for cabinet to cabinet use.
- Tool-less installation allows attachment directly to the cabinet side panel magnetically.
- Rugged, high quality design.
- Symmetrical design allows for mounting on left or right side.
- Reversible design — material is black on both sides.
- Can easily be removed and reapplied in minutes as your computer room needs change.
- Flame-rated materials.
- Adjustable Rack Gap Panel Striker Plate Kit allows for installation on non-metallic surfaces.

Benefits
- Reduces exhaust air recirculation.
- Supports reduced energy costs by providing the opportunity to increase set point temperatures and/or turn off cooling units or reduce fan speeds.
- Enables the reduction of bypass airflow.
- Improves cooling airflow, which allows for higher rack densities.
- Supports increased reliability and availability of IT equipment by reducing server intake temperatures.
- Modular design and out-of-the-box installation does not require 3rd party design, engineering, or construction, which minimises computer room disruption.

- The AisleLok® Adjustable Rack Gap Panel case measures 102mm W x 102mm D x 2,116mm - 2,344mm H (4"W x 4"D x 83.3 – 92.3"H) and is suitable for gap widths that range from 254mm to 1,524mm (10" to 60").
- The AisleLok® Adjustable Rack Gap Panel requires a minimum of 102mm (4") of clearance to install in a gap.

### Use

- AisleLok® Adjustable Rack Gap Panel is best suited for applications where a row gap exists between two adjacent cabinets. However, A Striker Plate Kit accessory allows for installation on non-metallic surfaces to accommodate areas where an adjacent cabinet is not present.
- The AisleLok® Adjustable Rack Gap Panel is supported by the floor and mounts magnetically against the side panel of the cabinet or other steel surface.
- To close off the gap, simply extend the retractable material across the gap, which effectively closes off the opening. The far side attachment also adheres magnetically to the adjacent cabinet or optional striker plates.

### Material

- The AisleLok® Adjustable Rack Gap Panel features a powder-coated steel case with a retractable reinforced PVC-coated fibreglass panel that features black matte surfaces on both sides.
- Flame rated materials (NFPA 701 and UL94HB) are used in the construction of the AisleLok® Adjustable Rack Gap Panel.

### Patent

- U.S. and international patents pending.

### AisleLok® Modular Containment

AisleLok® Modular Containment is an out-of-the-box modular aisle containment solution designed to offer the airflow management benefits of hot and/or cold aisle isolation, but with greater flexibility and plug and play installation. The AisleLok® Modular Containment solution is comprised of Rack Top Baffles, Bi-Directional Doors, and the Adjustable Rack Gap Panel.
