

TE 7000 Networking Racks

Outstanding cable management thanks to no impeding corner posts. Due to the use of pre-configured variants, numerous practical requirements can be directly met.

Applications are quickly and easily achieved via modular assembly. The bolt together construction guarantees a high level of flexibility in terms of assembly and dismantling.

Features & Benefits Include:

- Bolt together construction facilitates rapid assembly / disassembly.
- No corner posts enhance cross cabinet patching.
- Fan trays can be easily retrofitted without need to remove internal equipment.
- Transport castors make siting quick and easy.
- Levelling feet serve to compensate for floor irregularities.
- Matching premium accessories for rapid installation in the delivered state.

This “Network Specialist” will astound you. Behind this fast problem solving solution is an international background, holistic expertise, and the Rittal quality seal.

- Top Quality - Developed to international standards.
- Cost Effective - Inexpensively produced on three continents.
- Fast - Available immediately with customer proximity.
- Solution Diversity - Thanks to a comprehensive range of system accessories.

The direct route is the fastest. Its called plug & play! With this in mind, the development strategy is based on the principle, “As little as possible, but as much as necessary!” Rittal has created an outstanding solution. Two 482.6 mm (19”) mounting levels in the multi-functional profile create a solid framework. Load capacity 400 kg. This rack without an enclosure frame provides optimum accessibility, maximum use of the interior space, super-fast assembly.

You'll be amazed at what can be achieved.
