Gemtrac
High Density Media Storage

Gemtrac is a high density, quick access storage system that makes efficient use of your floor space. Each Gemtrac consists of two large cabinets with vertical drawers. The drawers offer pull-out-shelving and are supported by overhead tracks which connect the two cabinets. This patented design provides the highest storage per square foot for most small media applications. Gemtracs ship assembled as two separate cabinets, making installation clean and quick. Gemtracs have no floor tracks and can be positioned together to form corridors of storage.

The enclosed locking cabinet design provides protection against dust, light and sprinklers, as well as theft. Enclosed storage also provides a neat, organised look to your tape library, none of this is available with open tape racking.

Features & Benefits

- Enclosed design - Protects valuable media collections.
- Locks - Provides positive security and controlled access.
- Occupies only 25 square feet (2.4m²).
